Healthy  
Students

*Neighborcare Health's school-based health centers are full service health clinics that provide medical, mental health and dental services for students. Our health center teams partner with school nurses, teachers and staff to provide safe, appropriate, culturally-competent health care to youth where they already spend much of their time—at school. Together we help improve students' health and their ability to succeed in school and beyond.*

## We're in your school

Our health centers are located in 15 public schools throughout Seattle and Vashon Island. Health center services and appointments are available to all students in Seattle Public Schools and to all students in public and private schools on Vashon.

Visit your school's front office to learn the location of the Neighborcare Health school-based health center inside your school.

## Services include:

- Evaluation and treatment of common health problems
- Sports physicals
- Preventive health care
- Reproductive health
- Vaccinations
- Individual, family and group mental health counseling
- Family coordination to establish health care home
- Insurance enrollment assistance
- Crisis intervention
- Community and school-based referrals
- Health promotion and health education
- Dental services, including oral exams, cleanings, X-rays and fillings, are offered at some of our health centers. Talk with your school's health center to learn more.

Funding for the health centers is partially supported by the **Families, Education, Preschool, and Promise Levy** of the City of Seattle and the **Best Starts for Kids** investment of King County.

“At Neighborcare Health, we believe **everyone deserves a place to call home—** regardless of income or insurance status. Our health professionals work with each student and family to develop a **personal health improvement plan**. We encourage long-term relationships with patients and care for them **through all stages of life**.”

## Register today

Complete and sign the health center's registration forms to grant your child access to all the services available at school.

Under Washington state law, students under 18 can register themselves for some confidential services. Neighborcare Health encourages all students to include their parent/guardian in their health care decisions. If you have questions or concerns, please contact the health center in your school.

## Appointments

Appointments are available on weekdays before, during and after school hours. We are closed during school holidays and summer break. The health center will do everything possible to ensure students miss as little class time as possible. The health center gives Request to Report slips to students for appointments during school. Students may also visit the clinic without an appointment by getting a pass from their teacher or a referral from the school nurse.

## Fees and Insurance

All students in Seattle Public Schools and any student on Vashon can access the medical, dental and mental health services provided at a school-based health center. We accept a wide variety of health insurance plans, including Washington Apple Health (Medicaid). LabCorp bills students' health insurance plan for lab services.

Insurance is not required, and no student will be denied services due to inability to pay. Eligibility specialists are available to assist families and students to enroll in health insurance programs.

***WHEN THE HEALTH CENTER IS CLOSED, students and families can access medical, dental, and mental health services at any Neighborcare Health neighborhood clinic.***

*At Neighborcare Health, we believe in people working together to improve the health and wellness of our community. We serve more than 75,000 patients each year at more than 30 medical, dental and school-based clinics throughout Seattle and Vashon Island.*
